

Using a Wizard to Set Up Local Apps

You can also access your emails or groupware data by using suitable apps and clients on mobile devices or computers. You can use a wizard in the groupware to install and configure those apps and clients. The wizard includes the following functions:

- Installing and configuring apps and clients on devices such as PCs, tablets and smartphones. The supported devices are: Windows, Apple and Android.
- Installing an email client on Windows systems. The client makes your emails, appointments, tasks and contacts locally available.
- Installing the local Drive app for desktop and mobile devices. This app is downloaded and installed from respective the app store for the device. The local Drive apps synchronize your Drive app data with your computer or mobile device.
- Depending on the device, the configuration might also be possible by email or SMS. Advanced users can display the configuration data for a manual configuration.

Note: Depending on the configuration, the wizard might not be available. In this case you can manually install clients and apps.

How to use the wizard:

1. Click the **Settings** icon  on the right side of the menu bar. Click on **Connect your device**. The wizard will be launched.
2. Select your system and the required devices. Follow the instructions.
